

RNControl.com Quick Start Guide

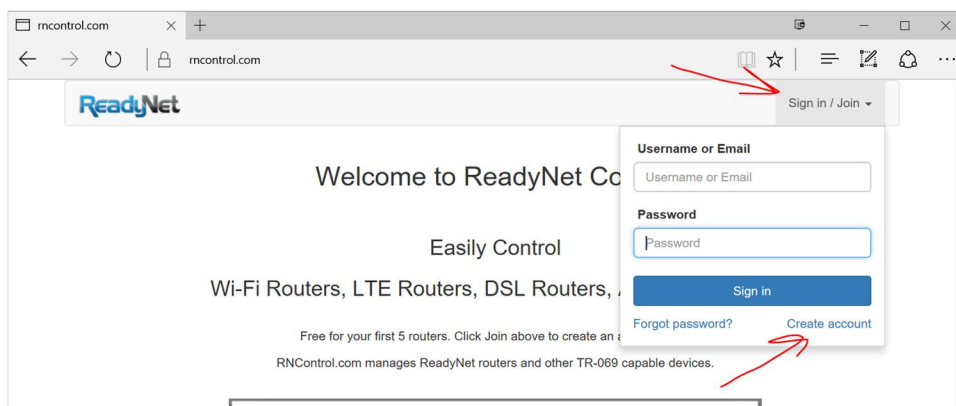

*this quick start guide provides the steps to set up and access RNControl.com for managing your ReadyNet managed-routers.

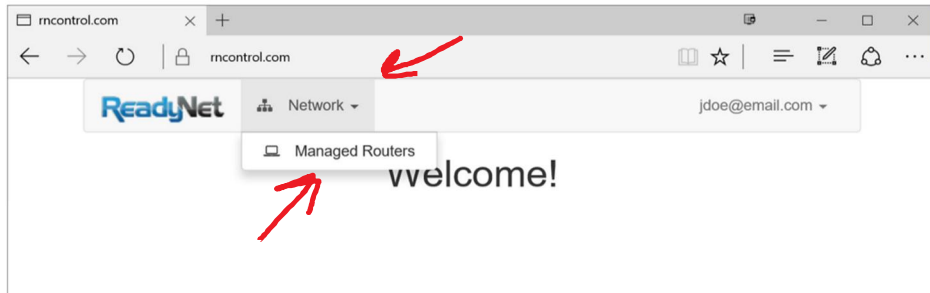

Step 1. Point your browser to <https://rncontrol.com>. Click "Sign in / Join", click "Create account" /

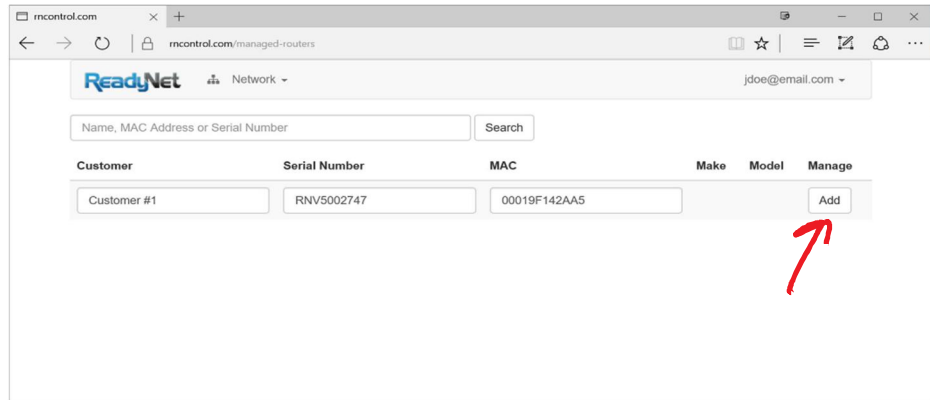

Step 2. Create a login account using a valid email address and choose a secure password:

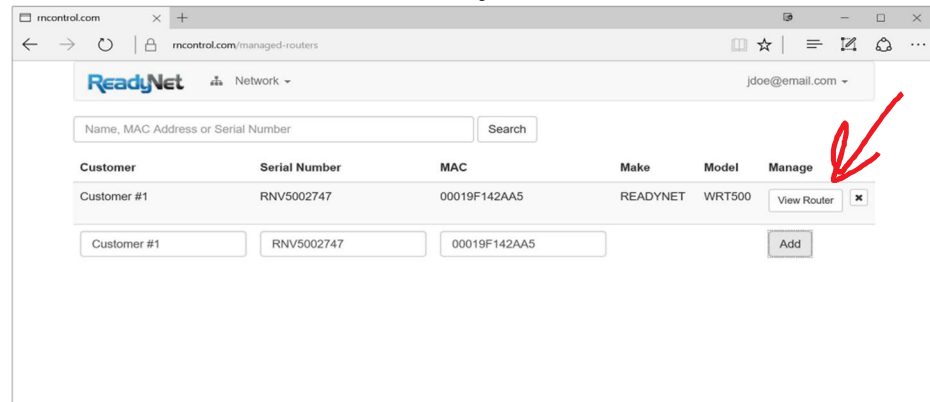

Step 4. Once your new account has activated you'll be ready to add/manage routers. Click on "Network", then click "Managed Routers".

Step 5. To add a router to manage, Enter the Customer name along with the Serial Number, and the WAN MAC address printed on the bottom of the router. Then click "Add".

Step 6. Click "View Router" button next to the newly added router.

Step 7. After clicking "View Router" a modal screen will pop up that allows you to manage the router remotely. Click the "x" at the top of the screen to close the modal screen and add/manage another router.
